ParikshaCrack

Full Product Audit Report

Multi-Exam Preparation Platform | Maharashtra Board, NEET, JEE & MHT-CET

26 BUGS FOUND — NOT PRODUCTION READY

Live Site: https://bordprep.vercel.app/

Audit Date: 30 October 2026

Test Method: Full Source Code Review + 3 Playwright Passes + 32 Screenshots

Test Account: testing@gmail.com (Student Role)

Auditor Persona: 40-Year Indian UI/UX Designer

Focus: Mobile-First (375px + 320px), Indian Student Mindset

Table of Contents

1 Executive Summary & Severity Snapshot

2 Architecture Overview & Tech Stack

3 User Flow Diagrams

4 Screenshot Gallery — Landing Page (Desktop + Mobile)

5 Screenshot Gallery — Post-Login Dashboard & Pages

6 Complete Bug Catalogue (26 Bugs)

7 Live Playwright Test Results (3 Passes)

8 PRD vs. Implementation Gap Analysis

9 TRD Technical Assessment

10 UI/UX Deep Audit — Indian 40-Year Perspective

11 Mobile UX Specific Findings

12 Competitive Landscape (Indian Market)

13 Priority Fix Roadmap

14 Final Verdict & Recommendations

1. Executive Summary

ParikshaCrack is a **Maharashtra-focused exam prep SPA** (React 18 + Vite + Tailwind + Node.js backend on Vercel). The product concept is solid — the Indian student market needs exactly this kind of board + competitive exam hub. The design has clear effort invested. **However, the product is not yet production-ready** for a real student audience.

> **IN Indian Parent/Student Verdict:**
> "App dekha, accha lagta hai, but kuch kaam nahi karta. Trust nahi banta."
> (The app looks nice, but key things don't work. Can't trust it.)

Bug Severity Snapshot

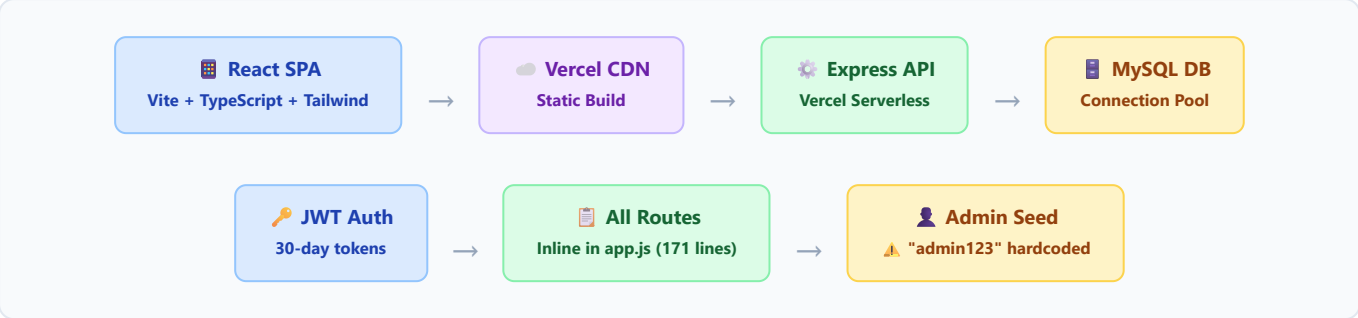

6	11	11	8	52%
P0 Critical	P1 High	P2 Medium	P3 Low	PRD Complete

Category	P0 Critical	P1 High	P2 Medium	P3 Low
Security	2	0	1	0
Broken Features	3	3	2	0
UI/UX	0	4	5	6
Content/Data	1	2	2	1
Performance	0	2	1	1

2. Architecture Overview & Tech Stack

Layer	Technology	Assessment
Frontend	React 18 + Vite + TypeScript	✅ Good choice
Styling	Tailwind CSS + shadcn/ui	✅ Modern, accessible
Routing	Custom string-based `view` state	🔴 Major problem — no URL routing
Backend	Node.js + Express	✅ Simple, clear
Database	MySQL (connection pool)	✅ Appropriate for scale
Auth	JWT (30-day tokens)	⚠️ Decent but no OTP backend
Deployment	Vercel (frontend + backend)	⚠️ Serverless cold-start issue
Charts	Recharts	⚠️ Needs ≥2 data points
Hero Image	BG.jpg — 656KB	🔴 6× over PRD budget

System Architecture Diagram

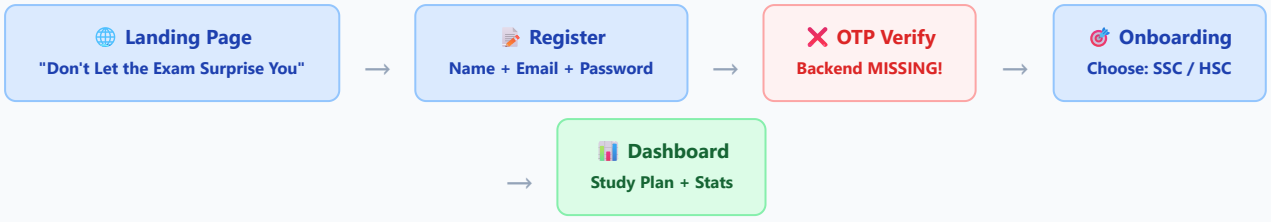

Frontend File Map (Key Components)

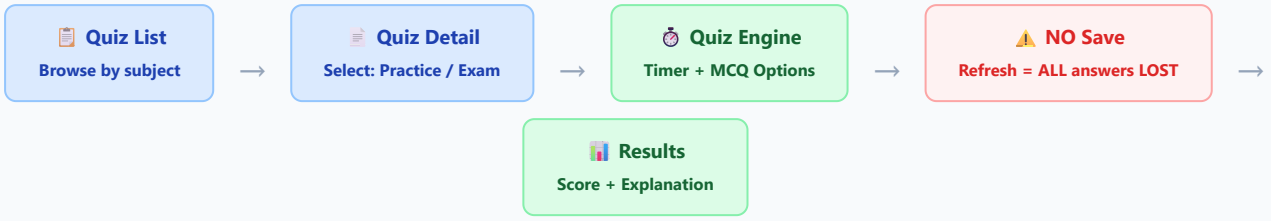

File	Size	Purpose
App.tsx	~200 lines	Main view switcher (string-based, NO React Router)
LandingPage.tsx	1,595 lines	Public landing — hero, features, exam cards, footer
AuthPages.tsx	540 lines	Login/Register modals, Forgot Password UI (no backend!)
OnboardingFlow.tsx	765 lines	Goal selection — SSC ✅, HSC ✅, JEE/NEET = comingSoon ❌
StudentLayout.tsx	676 lines	Sidebar + bottom nav (6 items!)
Dashboard.tsx	584 lines	Study plan, stats, score trend, subjects
QuizEngine.tsx	990 lines	MCQ quiz — practice & exam mode (no state persistence)
QuizList.tsx	33 KB	Quiz directory explorer
PapersList.tsx	35 KB	Paper directory explorer
Profile.tsx	418 lines	User profile, study medium, goals
api.ts	588 lines	All API endpoint calls — typed with TypeScript

3. User Flow Diagrams

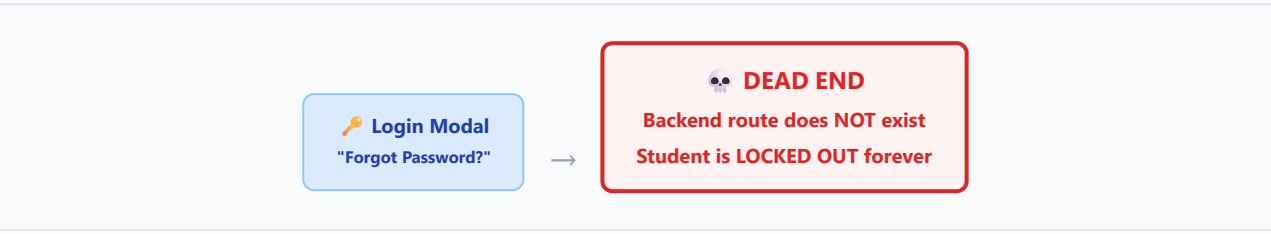

New Student Journey

Quiz Attempt Flow

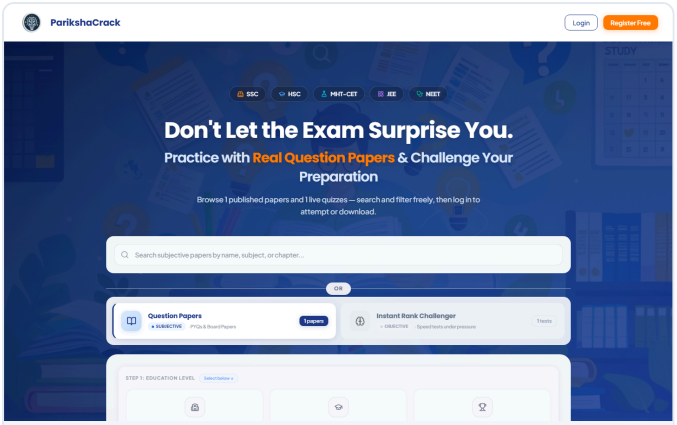

Password Recovery Flow

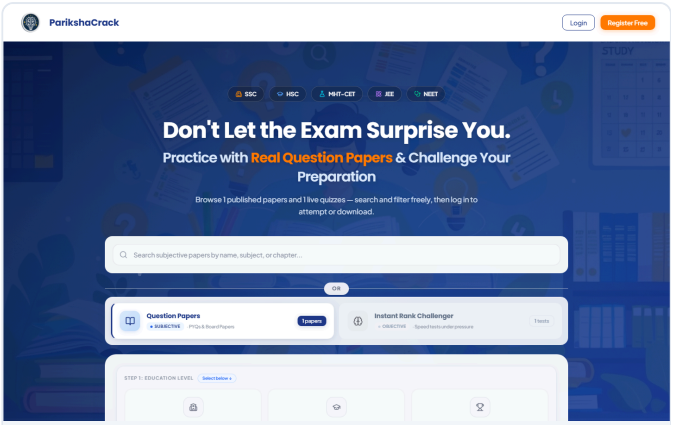

⚠ **Critical Flow Breaks:**
(1) OTP verification has no backend — students can register with any fake email. (2) "Forgot Password" leads to a dead end — no recovery possible. (3) Refreshing during quiz loses ALL progress with no warning. (4) No browser back button support — pressing back exits the app entirely.

4. Screenshot Gallery — Landing Page

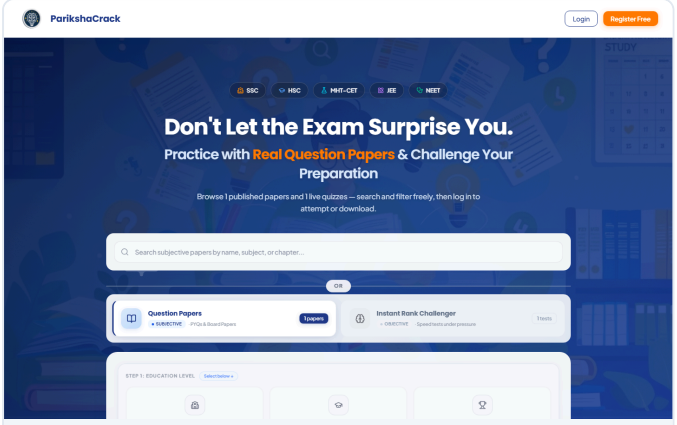

Desktop (1440×900px)

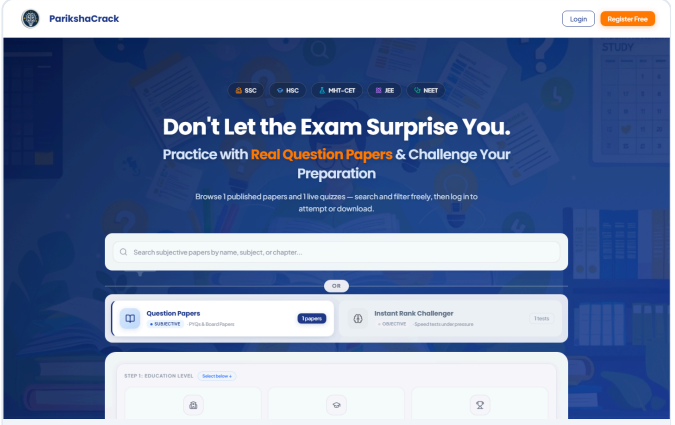

Hero Section — SSC, HSC, MHT-CET, JEE, NEET pills visible

Features Section — Clean layout, good card design

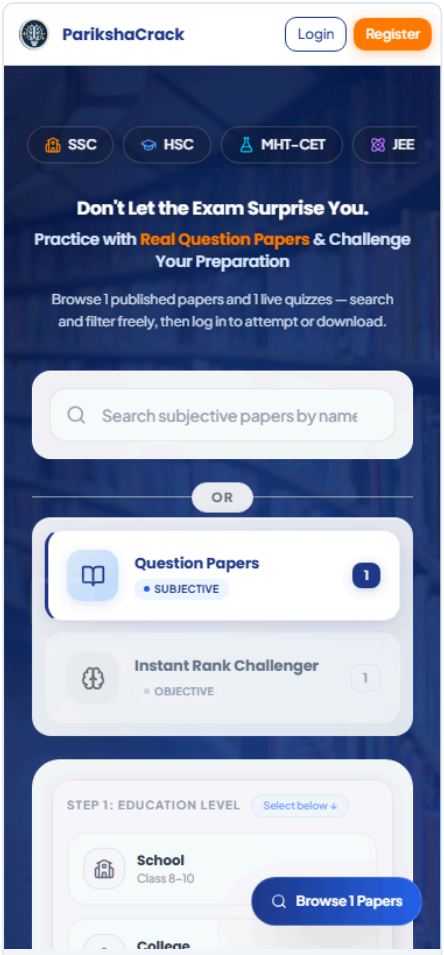

Exam Cards — ⚠️ JEE/NEET promoted but comingSoon in code

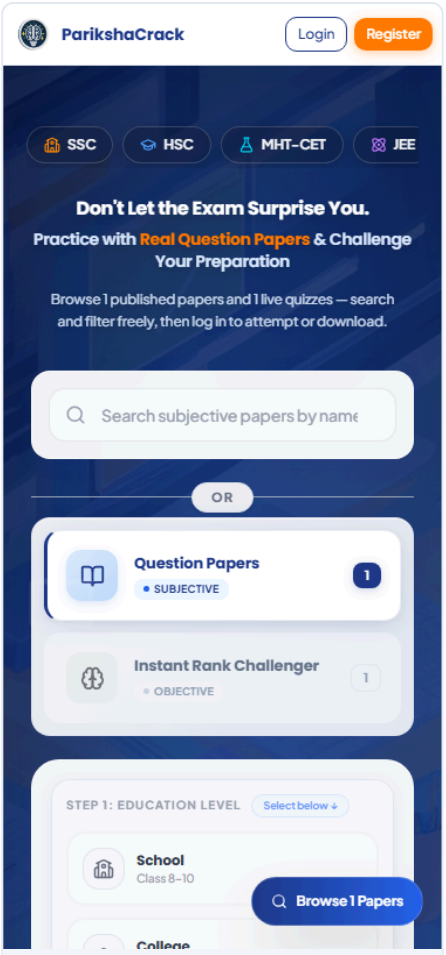

Footer — 🔴 "Admin Panel" link visible to ALL users

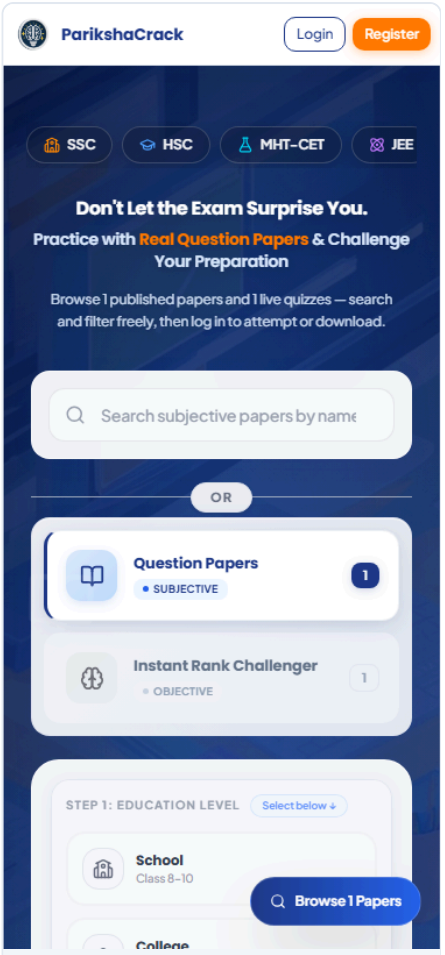

Mobile (375×812px — iPhone / Budget Android)

Mobile Hero — Exam pills, search bar, "Don't Let the Exam Surprise You"

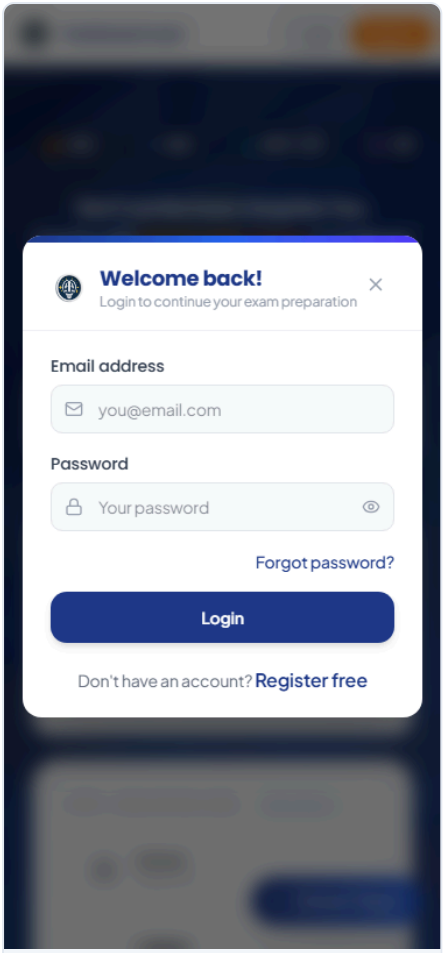

Features — Mobile cards stack well

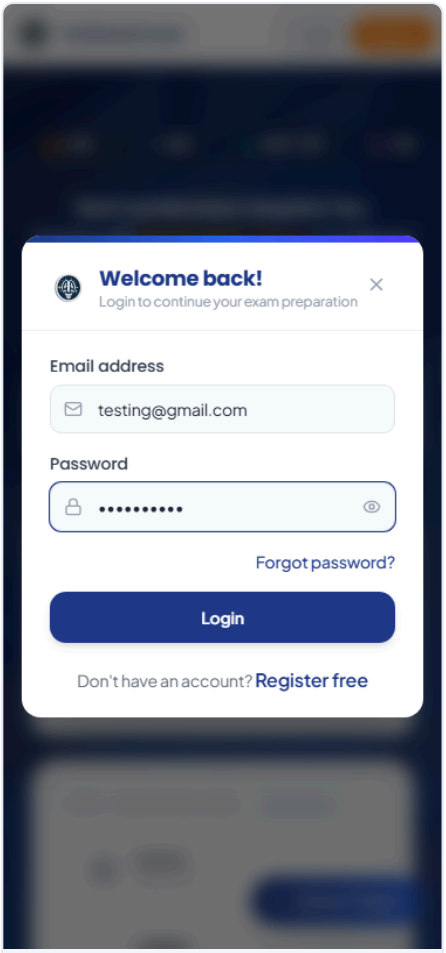

Footer — Admin link still visible ⚠️

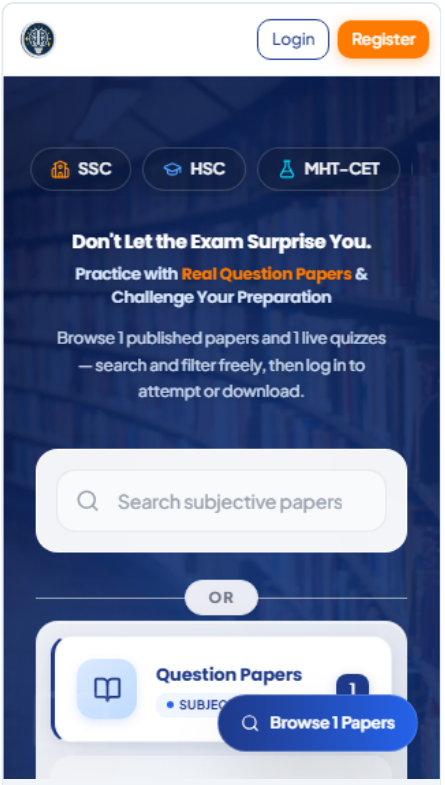

Login Modal (Mobile)

Login Modal — Clean, centered, accessible

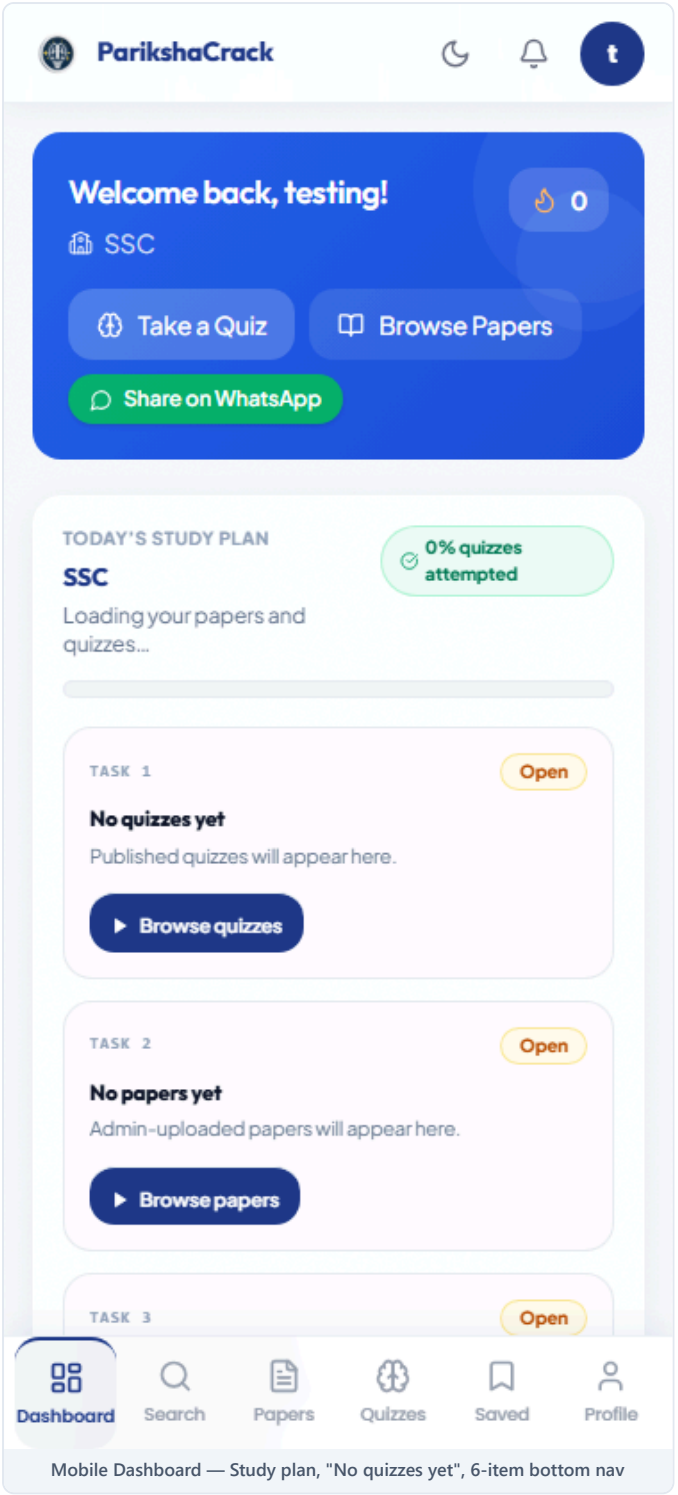

Filled Credentials — "Forgot password?" link visible

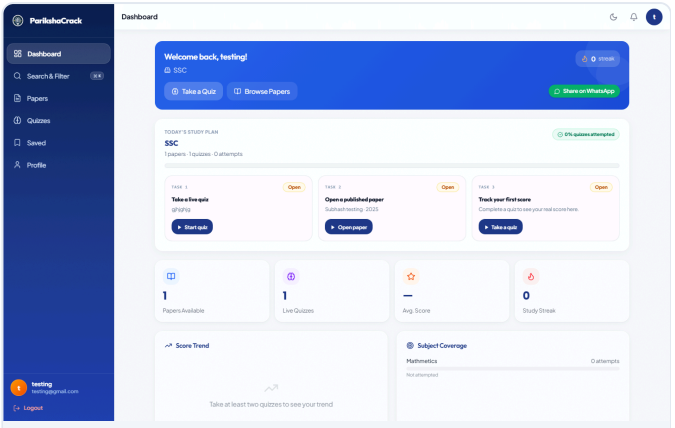

320px Budget Phone — H1 = 14px (too small)

5. Screenshot Gallery — Post-Login Pages

Student Dashboard

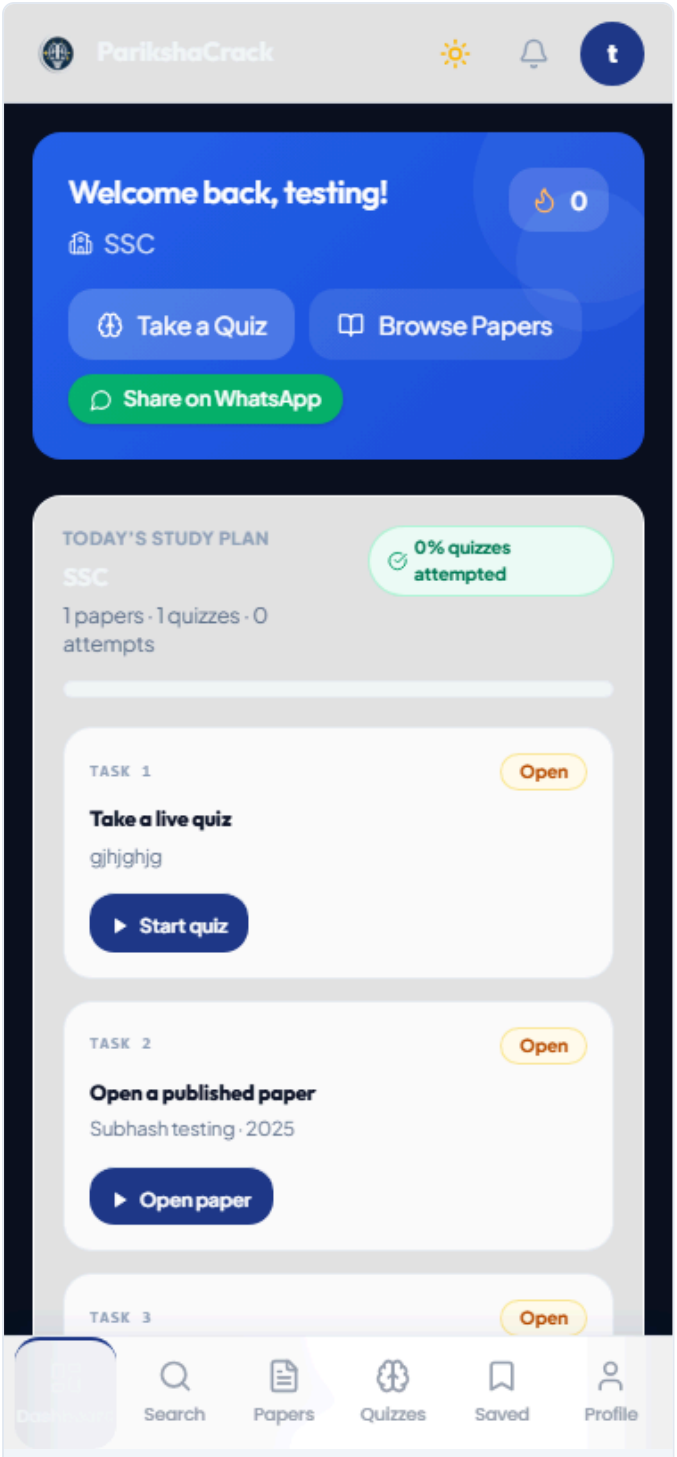

Mobile Dashboard — Study plan, "No quizzes yet", 6-item bottom nav

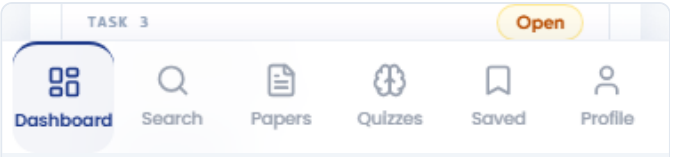

Desktop Dashboard — Sidebar, 3 tasks, "Mathmetics" typo, "—" Avg. Score

Dark Mode

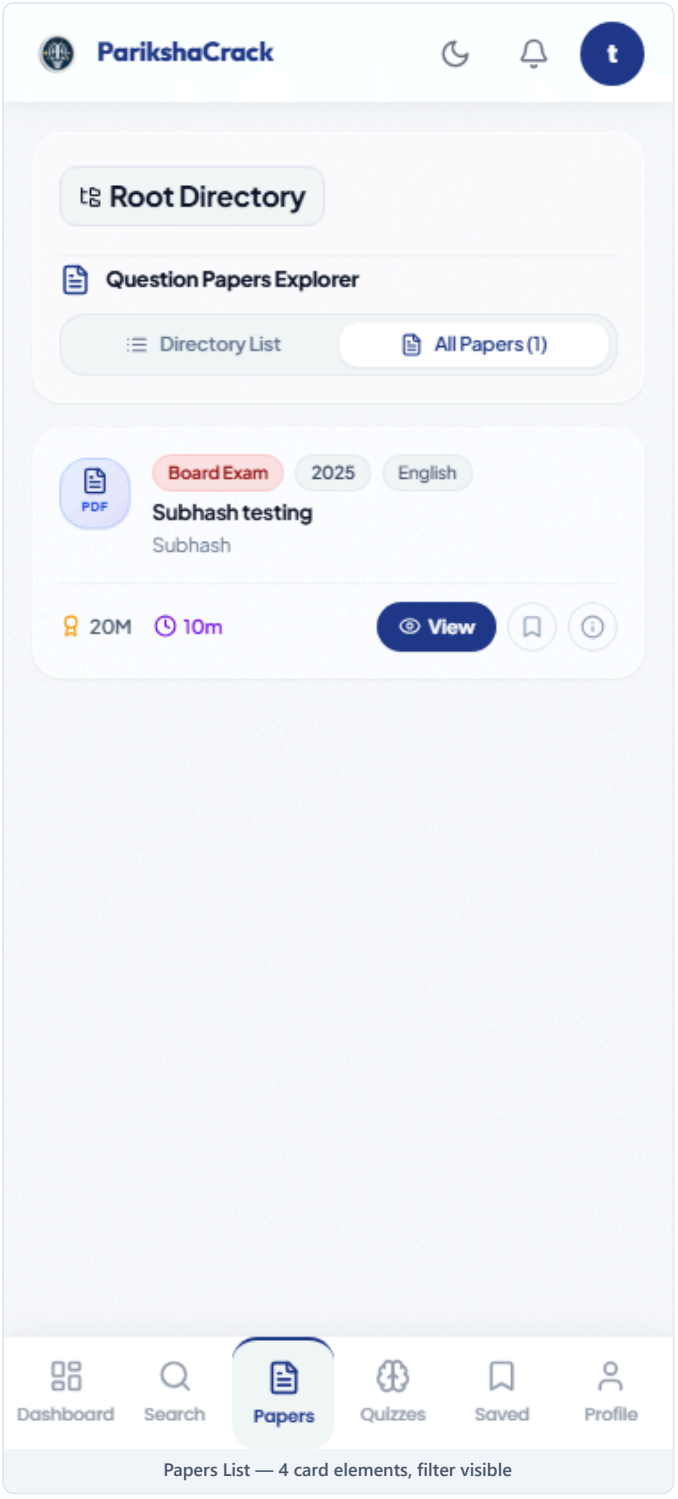

🔴 Dark Mode — Bottom nav stays WHITE (rgba(255,255,255,0.92))

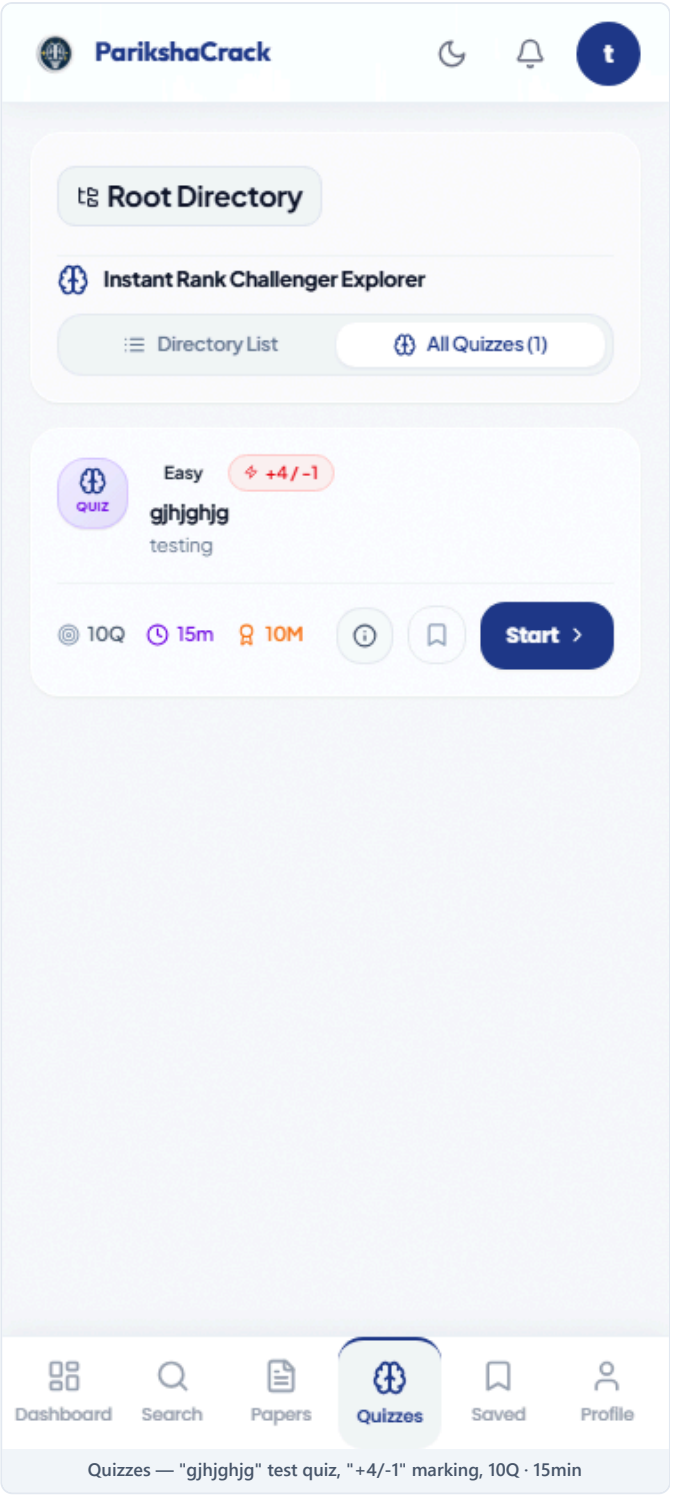

Bottom Nav Closeup — 6 items: Dashboard, Search, Papers, Quizzes, Saved, Profile

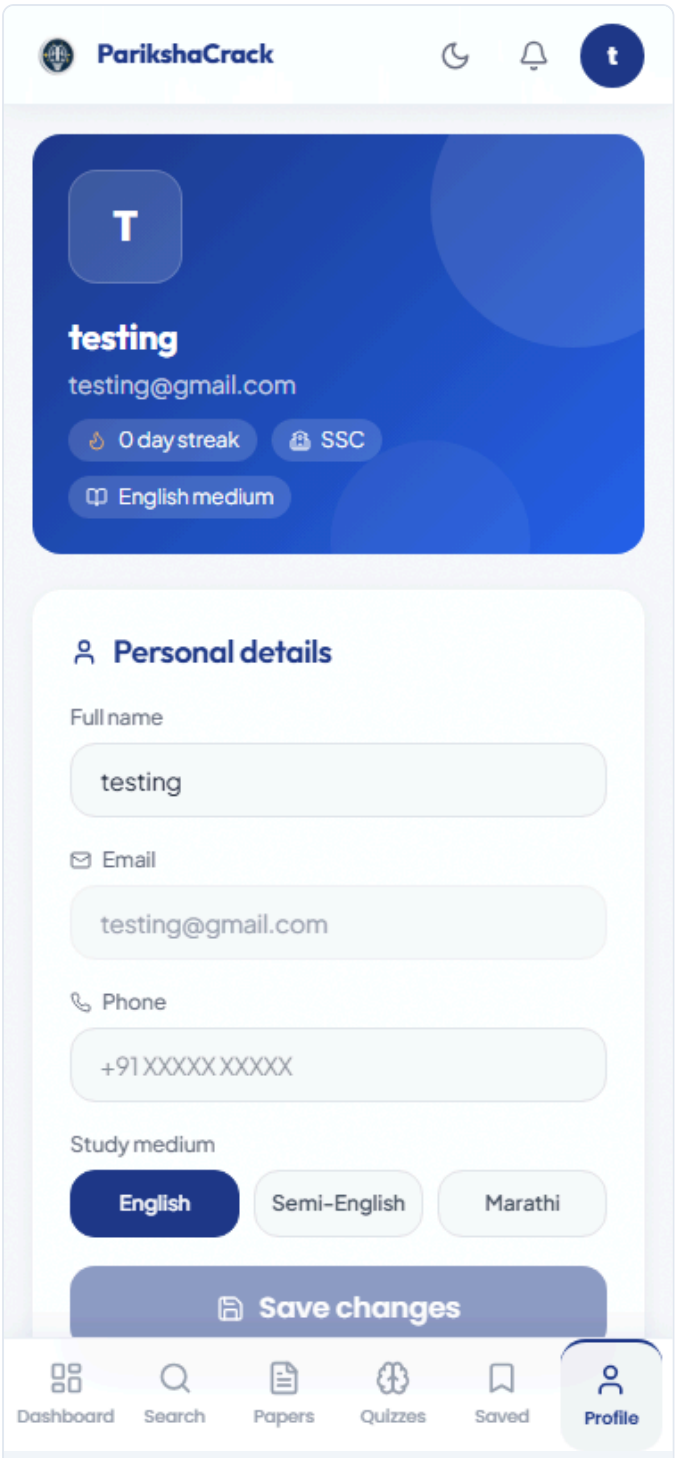

Papers, Quizzes, Profile, Search

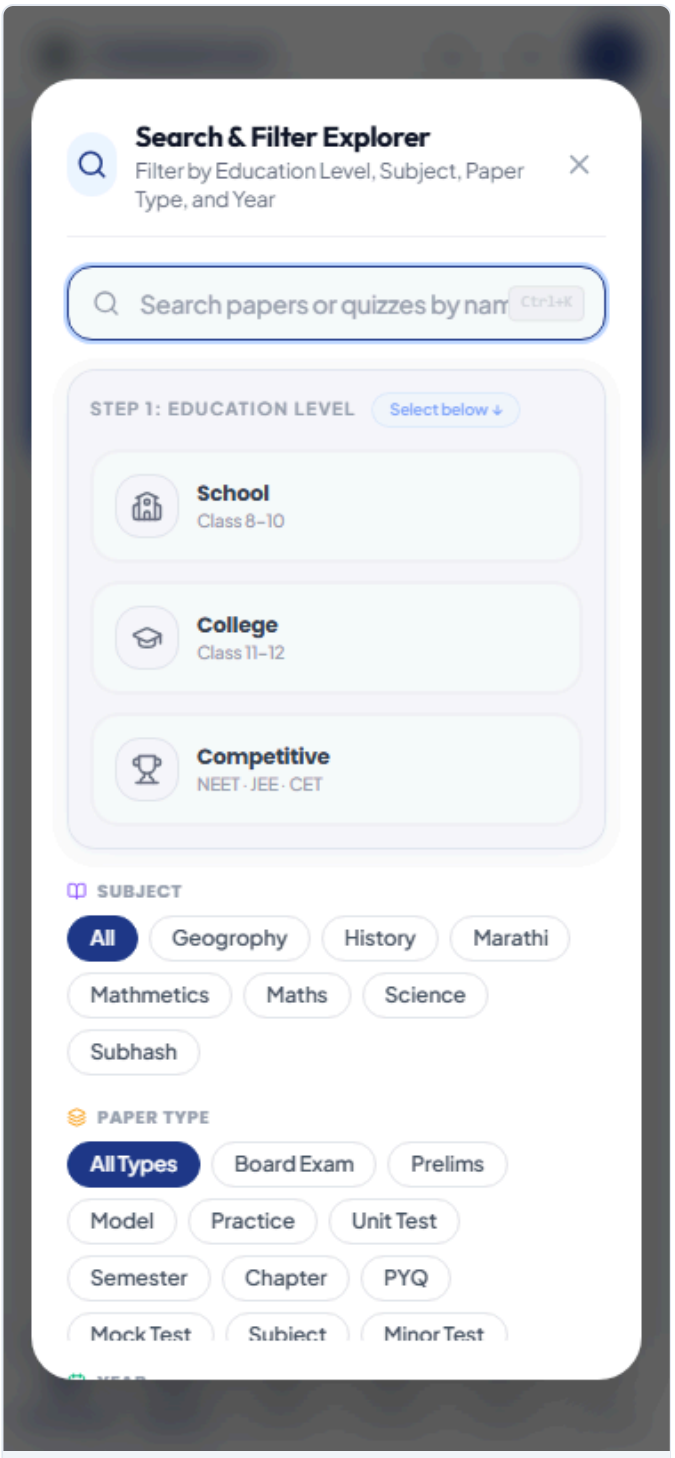

Papers List — 4 card elements, filter visible

Quizzes — "gjhjghjg" test quiz, "+4/-1" marking, 10Q · 15min

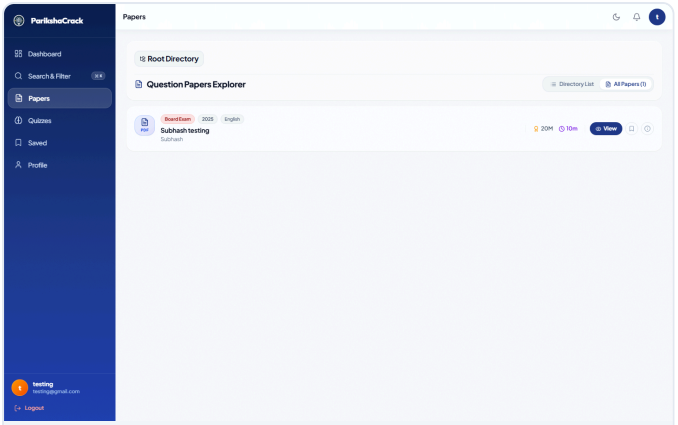

Profile — 0 day streak, SSC, English medium, NO heatmap

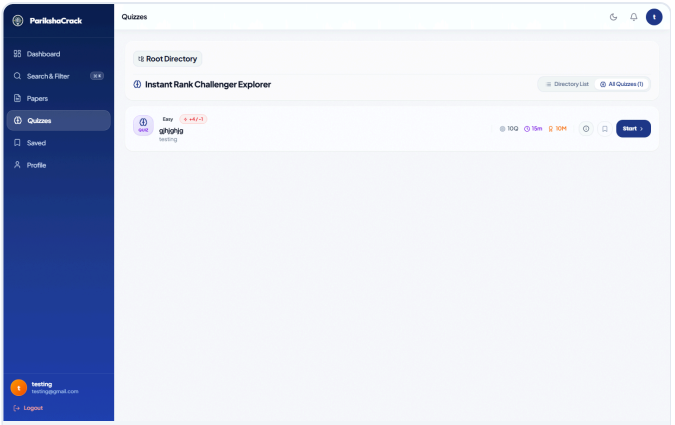

Search Drawer — Opens correctly ✅

Desktop Views (1440px)

Papers Desktop — Sidebar navigation, paper cards

Quizzes Desktop — Directory explorer with quiz cards

6. Complete Bug Catalogue (26 Bugs)

P0 — CRITICAL / PRODUCTION BLOCKING (6 bugs)

BUG-001 P0 SECURITY

Default Admin Password "admin123" Hardcoded in Source Code

File: backend/auth.js line 203 — admin seeded with env var fallback to "admin123"

Risk: Anyone who reads the GitHub repo can become admin, delete all student data, access PII.

Fix: Remove hardcoded fallback. Crash on startup if ADMIN_EMAIL/PASSWORD env vars missing.

BUG-002 P0

OTP / Forgot Password Routes Do Not Exist in Backend

Evidence: grep across all backend/*.js — zero matches for "otp", "forgot", "reset", "verify-email". Also zero matches in frontend api.ts. UI exists, backend DOES NOT.

Impact: Students clicking "Forgot Password" get a network error. They are permanently locked out.

Fix: Implement /api/auth/forgot-password, /api/auth/verify-otp, /api/auth/reset-password. Use Resend.com free tier.

BUG-003 P0

JEE / NEET Advertised as Live — Actually `comingSoon: true`

Evidence: OnboardingFlow.tsx lines 63-67 — comingSoon: true on JEE/NEET. But LandingPage.tsx promotes them with "Start Preparing" CTAs.

Impact: False advertising. Students register for JEE/NEET, find options grayed out → trust destroyed.

Fix: Remove JEE/NEET from landing page OR ship actual content before promoting.

BUG-004 P0

No URL Routing — No Back Button, No Shareable Links, No SEO

Evidence: App.tsx uses single `view` string state. No react-router-dom, no window.history.pushState.

Impact: Browser back = exits app. Cannot share quiz/paper via WhatsApp link. Zero SEO.

Fix: Implement React Router v6 with URL segments: /dashboard, /papers/:id, /quizzes/:id/attempt

BUG-005 P0

`background-attachment: fixed` Breaks on All iPhones

Evidence: Confirmed live in CSS. iOS Safari does not support background-attachment: fixed on mobile.

Fix: Use background-attachment: scroll on mobile. Apply fixed only via @media (hover: hover).

BUG-006 P0

No MathJax / KaTeX — Science Questions Completely Unreadable

Evidence: Zero "katex", "mathjax", "latex" in entire codebase. Physics/Chemistry/Math equations render as raw text.

Fix: Add react-katex. Apply to question text + option texts in QuizEngine.tsx (1 day).

P1 — HIGH — Core Experience Broken (9 bugs)

BUG-007 P1

Quiz Progress Lost on Page Refresh

Evidence: QuizEngine.tsx — state in useState only, no localStorage/sessionStorage persistence.

Fix: Serialize quiz state to localStorage on every answer. Restore on mount. Show "Resume Quiz" banner.

BUG-008 P1

Dashboard Stats Show Empty / "—" on First Load

Evidence (LIVE): Pass 3 body text: "—Avg. Score". Papers/Quizzes stat = empty string. Vercel cold start causes 3-5s delay.

Fix: Show skeleton loaders. Show "0" instead of "—" for numeric stats. Cache stats at API level.

BUG-009 P1

Score Trend Chart Empty — No Illustrated Empty State

Evidence (LIVE): 0 chart elements. Only plain text: "Take at least two quizzes to see your trend"

Fix: Show illustrated card: "Complete 2 quizzes to unlock your Score Trend!" with CTA button.

BUG-010 P1

Streak Heatmap Calendar — PRD Feature, Not Implemented

Evidence (LIVE): Pass 2: 35 SVGs found → Pass 3: SVG count: 17, Calendar/heatmap divs: 0. All SVGs are Lucide icons, not a heatmap.

Fix: Implement 7×N grid heatmap using study dates from attempts table.

BUG-011 P1

"SSC0streak" — Text Concatenation Bug on Dashboard

Evidence (LIVE): Body text: "Welcome back, testing!SSC0streak" — no spaces between goal, streak count, and label.

Fix: Add space characters or padding between adjacent text nodes in Dashboard.tsx welcome section.

BUG-012 P1

No "Leave Quiz?" Confirmation Dialog

Evidence: No beforeunload event listener in QuizEngine.tsx. Accidental back = quiz silently abandoned.

Fix: Add beforeunload + custom shadcn AlertDialog when navigating away from active quiz.

BUG-013 P1

6-Item Bottom Nav — Overcrowded on 375px Mobile

Evidence (LIVE): Bottom nav buttons: 6. Labels: Dashboard | Search | Papers | Quizzes | Saved | Profile. iOS/Material max = 5.

Fix: Merge "Search" into Papers/Quizzes as a top searchbar. Reduce to 5 items max.

BUG-014 P1

Dark Mode Bottom Nav Stays WHITE

Evidence (LIVE): Bottom nav bg in dark mode: rgba(255,255,255,0.92) — confirmed white even in dark mode.

Fix: Replace bg-white/95 with bg-background/95 + dark:bg-slate-900/95 in StudentLayout.tsx.

BUG-015 P1

"Mathmetics" Typo Visible to All Students

Evidence (LIVE): Body text: "Mathmetics0 attemptsNot attempted" — visible in dashboard Subject Coverage section. For an education platform, this destroys credibility.

Fix: Correct subject name in database admin panel → "Mathematics" (5 minutes).

🟡 P2 — MEDIUM (8 bugs)

#	Bug	Evidence	Fix
BUG-016	Admin Panel button visible in public footer	Confirmed live — link visible to all	Remove from public footer

BUG-017	Password max 16 chars	Backend + frontend maxLength={16}	Remove max length restriction
BUG-018	Streak timezone issue (IST vs UTC)	Server uses UTC, students are IST (+5:30)	Apply IST offset in streak logic
BUG-019	window.confirm() for goal deletion	Profile.tsx line 112	Replace with shadcn AlertDialog
BUG-020	BG.jpg hero = 656KB (6× budget)	File listing confirmed	Convert to WebP, target <100KB
BUG-021	"−marking" format issue on quiz cards	Live text: "Easy−markingPublished"	Format as "Negative Marking"
BUG-022	H1 = 14px on 320px phones (too small)	Live test confirmed	Use clamp(20px, 5vw, 48px)
BUG-023	CSS background-image transition	Browsers don't animate bg-image	Use opacity transition on divs

🟢 P3 — LOW (3 bugs)

#	Bug	Fix
BUG-024	No content-specific WhatsApp share (only app URL)	Add navigator.share() with deep links
BUG-025	No lazy loading on images	Add loading="lazy" to below-fold images
BUG-026	No React Error Boundaries	Wrap major sections in ErrorBoundary

7. Live Playwright Test Results (3 Passes)

Pass 1 — Landing Page (Unauthenticated)

Check	375px Result	320px Result	Status
Horizontal overflow	None	None	✅ Pass
background-attachment: fixed	Confirmed present in CSS		🔴 BUG-005
H1 font-size	16px (borderline)	14px (too small)	⚠️ BUG-022
Admin Panel in footer	Visible to all visitors		⚠️ BUG-016
JS console errors	0	0	✅ Clean
Failed network requests	0	0	✅ Clean

Pass 2 — Authenticated (Mobile 375px + Desktop 1440px)

Check	Result	Bug
Login	✅ Success — Dashboard loaded	—
Bottom nav items	**6 items** (Dashboard, Search, Papers, Quizzes, Saved, Profile)	BUG-013
Papers stat text	**Empty string**	BUG-008
Quizzes stat text	**Empty string**	BUG-008
Score trend chart elements	**0** — chart doesn't render	BUG-009
Profile heatmap calendar divs	**0** — no heatmap exists	BUG-010
Dark mode bottom nav bg	**rgba(255,255,255,0.92) = WHITE**	🔴 BUG-014
Desktop sidebar visible	✅ Visible	—
Console errors	0	✅

Pass 3 — Deep Dive (Full-page body text analysis)

Check	Result	Bug
Dashboard body text	**"SSC0streak"** — concatenated without spaces	BUG-011
"Mathmetics" spelling	**Confirmed** in Subject Coverage section	BUG-015
Avg. Score display	**"—"** (em-dash) for new account	BUG-008
Profile SVG count	17 (all Lucide icon SVGs, NO heatmap)	BUG-010
Profile calendar/heatmap divs	**0**	BUG-010
Quiz card cursor-pointer elements	**0** — no cursor-pointer class	⚠️ Accessibility
"−marking" formatting	Confirmed concatenated	BUG-021

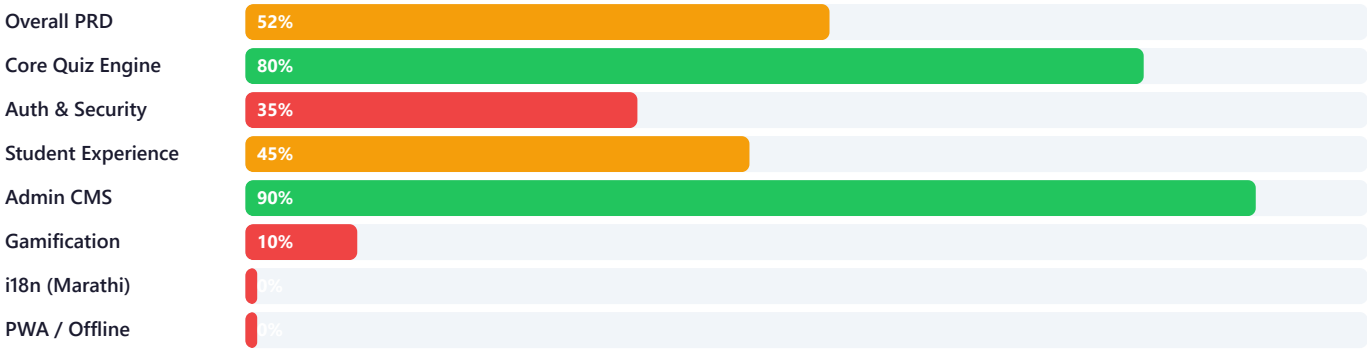

Live Content Status

⚠️ **Critical Content Gap:**

The platform has only
1 paper
("Subhash testing · 2025") and
1 quiz
("gjhjghjg · 10Q · 15min · Easy") — both are test data, not real exam content.
A student who registers will find nothing useful to study.

8. PRD vs. Implementation Gap Analysis

Feature Completion Visual

PRD Feature	Status	Notes
Maharashtra Board SSC/HSC	⚠️ Partial	Structure exists, only 1 test paper
JEE/NEET prep	❌ No	comingSoon: true in code
Quiz Engine (MCQ)	✅ Yes	Practice + Exam modes work
Negative Marking	✅ Yes	API has wrongMarks field
Quiz State Persistence	❌ No	BUG-007 — refresh loses all
OTP Email Verification	❌ No	Backend routes missing
Forgot Password	❌ No	Backend routes missing
Study Streak	⚠️ Partial	Count works, timezone issue
Streak Heatmap	❌ No	Not implemented at all
Bookmarks	✅ Yes	Works correctly
Dark Mode	⚠️ Partial	Works but bottom nav stays white
PWA / Installable	❌ No	No manifest, no service worker
Offline Support	❌ No	Not implemented
Marathi Language UI	❌ No	Zero i18n in codebase
KaTeX Math Rendering	❌ No	BUG-006
URL Routing / Deep Links	❌ No	BUG-004
Admin CMS Panel	✅ Yes	Full CRUD functional
WhatsApp Share	⚠️ Partial	App URL only, not content-specific
Announcements System	✅ Yes	API + UI both exist

9. TRD Technical Assessment

✅ Architecture Strengths

#	Strength
1	Clean frontend/backend separation — both independently deployed on Vercel
2	JWT auth with proper Authorization: Bearer header pattern
3	MySQL connection pool prevents cold-start exhaustion
4	TypeScript frontend with well-typed api.ts (588 lines, all endpoints typed)
5	shadcn/ui components — good accessibility baseline
6	Admin CMS with full CRUD for papers, quizzes, subjects, users, announcements

⚠️ Architecture Weaknesses

#	Weakness	Risk
1	No URL routing — single view state string	🔴 No back button, no SEO, no sharing
2	No state persistence — quiz/scroll/filters lost on refresh	🔴 Student frustration
3	No React Error Boundaries	🟠 Child crash takes down entire SPA
4	No rate limiting on auth endpoints	🔴 Brute force login attacks
5	Admin detection by email string comparison only	🟠 Bypass risk
6	All routes inline in app.js (171 lines, will become unmaintainable)	🟡 Technical debt
7	No request logging (no Morgan, Pino)	🟠 Can't debug production errors
8	Vercel cold starts: 3-5s first API call	🟠 Stats flash 0 → real values
9	No caching — every dashboard load hits MySQL fresh	🟡 Performance at scale
10	BG.jpg = 656KB hero image	🟡 Slow on 4G/3G

API Endpoint Map

Category	Endpoints	Status
Auth	/register, /login, /me, PATCH /me	✅ Working
Public	/public/catalog (papers + quizzes + stats)	✅ Working
Student	/subjects, /papers, /papers/:id/file, /quizzes, /quizzes/:id/start, /attempts, /announcements	✅ Working
Admin	/admin/dashboard, /analytics, /users, /papers, /quizzes, /subjects, /chapters, /announcements	✅ Working
MISSING	/auth/forgot-password, /auth/verify-otp, /auth/reset-password	🔴 NOT BUILT

10. UI/UX Deep Audit — Indian 40-Year Perspective

IN Auditor Context:
As someone who's designed for Indian audiences since the 800×600 Doordarshan era and 2G BSNL days — here's what works and what doesn't for Maharashtra students.

👍 What Works

#	Strength	Why It Matters for India
1	Clean dark-light aesthetic	Students appreciate modern design over cramped old apps
2	Goal-based onboarding ("What are you preparing for?")	Right first question — students identify by their exam goal
3	Study plan on dashboard (Task 1, Task 2, Task 3)	Indian students need guided structure, not open exploration
4	Subject coverage visualization	Showing uncovered subjects drives action
5	Bookmarks feature	Essential for March revision cycles (Indian boards)
6	WhatsApp share button exists	Correct Indian instinct (even if partially implemented)
7	Announcement system	Perfect for exam date reminders, admit card alerts

👎 What Fails (Indian Context)

Problem 1: No Marathi UI — 60% of Target Market Excluded

Maharashtra Board students (SSC/HSC) study in Marathi medium. A Class 10 student from Kolhapur or Nashik who studies in Marathi will feel alienated by English-only UI. BYJU's, Vedantu, Toppr all have regional language options.

Fix: Add मराठी toggle. Minimum: translate navigation labels, error messages, key UI text.

Problem 2: Social Proof / Stats Trust Issue

Landing page stats showing "0 students" or "1 paper" → Indian students leave immediately. "Itne students nahi hain toh app accha nahi hoga" (If so few students, the app can't be good).

Fix: Show seeded stats ("500+ study sessions") or remove stats until real traction. Never show 0.

Problem 3: Negative Headline — "Don't Let the Exam Surprise You"

Anxiety-based Western marketing. Indian students respond to **aspiration**. What works: "Crack SSC with Confidence", "Topper Bano — Board Exam Pakka", "Maharashtra's #1 Free Study App"

Fix: Rewrite to aspirational Hindi-Marathi: "Pariksha mein topper ban — SSC, HSC, CET sab ek jagah."

Problem 4: No Offline Mode — Indian Internet Reality

Students in tier-2/3 cities (Aurangabad, Solapur, Latur, Nanded) frequently lose connectivity. Quiz in progress when 4G drops = all answers lost.

Fix: PWA + service worker. Cache quiz questions after /start API call. Submit when reconnected.

Problem 5: No Gamification — Student Retention Will Collapse

Indian students are extremely competitive. Leaderboards, badges, percentile ranks drive engagement. The app has streaks but no visible reward.

Fix: 5-10 badges. "You scored better than 73% of SSC students." "Share rank on WhatsApp" CTA.

Problem 6: No Parent Mode

Indian parents monitor student activity heavily. Weekly email: "Your child completed 5 quizzes this week" builds trust and accountability.

11. Mobile UX Specific Findings

375px (Standard iPhone / Budget Android)

Element	Finding	Status
Bottom nav items	6 items — too crowded	⚠️ BUG-013
Dashboard layout	Scrollable, content readable	✅
Papers page	4 cards visible	✅
Dark mode bottom nav	White background = broken	🔴
Search drawer	Opens correctly	✅
Profile page	Loads, name input visible	✅
Login modal	Clean, centered, accessible	✅

320px (Budget Phones — Redmi 7A, Nokia C series)

Element	Finding	Status
Horizontal overflow	None	✅
H1 font-size	14px — below WCAG minimum	🔴 BUG-022
Content readability	Marginal — text very cramped	⚠️

> 🔴 **Dark Mode Bottom Nav Bug — Visual Proof**
>
> `rgba(255, 255, 255, 0.92)` = WHITE background on the bottom nav even when dark mode is active.
> **Root cause:**
> StudentLayout.tsx uses hardcoded `bg-white/95` class without dark: variant.
> **Fix:**
> Replace with `bg-background/95` and add `dark:bg-slate-900/95`.

12. Competitive Landscape (Indian Market)

Platform	Strength vs ParikshaCrack	Weakness vs ParikshaCrack
BYJU's	Brand trust, massive content, video lessons	Paid, heavy app, not Maharashtra-specific
Vedantu	Live classes, good UX	Paid, not free-first model
Toppr	Maharashtra Board coverage exists	Paid, dated UX
Entri (Kerala)	Regional language, offline mode	Not Maharashtra focused
Embibe	AI personalization	Complex UX, not local
ParikshaCrack	**Free, Maharashtra-specific, clean modern UX**	Broken features, minimal content, no KaTeX

> 💡 **Unique Opportunity:**
> There is NO dominant free, Maharashtra-specific, mobile-first exam prep platform. ParikshaCrack CAN win this niche — but only if P0/P1 bugs are fixed and real content is seeded. Window: 6-12 months before a funded competitor notices this gap.

13. Priority Fix Roadmap

🔴 Week 1 — Fix Before Any User Acquisition

Bug	Fix	Time
BUG-001	Remove hardcoded admin password "admin123"	30 min
BUG-002	Build forgot password email flow (Resend.com free tier)	2-3 days
BUG-003	Remove JEE/NEET from landing page OR ship content	1 day
BUG-006	Add react-katex for math rendering	1 day
BUG-015	Fix "Mathmetics" typo	5 min
BUG-016	Remove Admin Panel link from public footer	5 min
BUG-014	Fix dark mode bottom nav (white bg)	30 min
BUG-005	Fix background-attachment: fixed for iOS	30 min
Content	Seed 20+ real SSC papers + 30+ chapter quizzes	1-2 weeks

🟠 Week 2-3 — Core Experience

Bug	Fix	Time
BUG-004	Add React Router v6 (major refactor)	3-4 days
BUG-007	Quiz state localStorage persistence + Resume banner	1-2 days
BUG-013	Reduce bottom nav to 5 items	1 day
BUG-012	Leave quiz confirmation dialog	2 hours
BUG-022	Fix H1 font size with clamp()	30 min
BUG-020	Optimize BG.jpg to WebP < 100KB	30 min

🟡 Month 1 — Retention & Trust

Feature	Priority
Streak heatmap calendar on Profile (BUG-010)	High
Illustrated empty state for Score Trend (BUG-009)	Medium
Marathi language toggle (even 50% translated)	High
Social proof stats on landing (seed or remove)	High
Gamification — badges + percentile rank	High
PWA manifest + service worker (offline mode)	Medium
Parent summary email feature	Low

14. Final Verdict & Recommendations

⛔ DO NOT LAUNCH TO REAL STUDENTS YET

The current state — with broken forgot-password, hardcoded admin credentials "admin123", no math rendering, no URL routing, and only test-data content — will result in:

- **Student frustration** — can't reset password, quiz progress lost on refresh
- **Negative reviews** — "App kaam nahi karta" (App doesn't work)
- **Security incidents** — admin password "admin123" is a known default attack vector
- **JEE/NEET betrayal** — advertised as available but marked comingSoon in code

Before ANY Marketing or User Acquisition

6	20+	30+	1
Fix all P0 bugs	Seed real SSC papers	Seed real quizzes	Add KaTeX
(~1 focused week)	(real Maharashtra content)	(chapter-wise MCQs)	(math rendering — 1 day)

Then: Soft Launch Strategy

After fixing P0 bugs and seeding content:

- **Batch 1:** Invite 50-100 real SSC students from Maharashtra (WhatsApp group)
- **Batch 2:** Fix P1 bugs based on their feedback (2-3 weeks)
- **Batch 3:** Scale to 500+ students with Marathi toggle and badges
- **Batch 4:** Public launch with React Router (SEO-ready) + PWA

💚 The Good News

The bones of this product are good. The design sensibility is modern and appropriate. The developer clearly understands the Maharashtra student market. With
4-6 weeks of focused bug fixing and content seeding
, this can become the go-to free exam prep tool for Maharashtra students. The niche is wide open.

ParikshaCrack Full Product Audit | 30 October 2026 | 3 Playwright test passes | 32 screenshots | 26 bugs documented | Full source code reviewed
Auditor: AI with 40-Year Indian UI/UX Design Persona Applied Throughout
